

Printing

Print one sheet for every two students, then cut down the center.

To save paper, project the questions onto the wall and have students record their answers in a notebook.

Ideas for implementation

Extend this activity to work with probability concepts as well. Before handing out the fortune cookies, place them in a takeout box at the front of the room. Tell students how many cookies there are, then ask questions about pulling one out.

(such as "If there are 3 broken cookies, and each student gets 2 cookies, what is the probability of one of your cookies being broken?")

Solve for x. 18	Solve for x. $x + 8 = -9$	Solve for x. -20	Solve for x. $x = -4x$	Solve for x. $2 = 4x$
Solving One Step				
Solve for x. $8 = x + (-2)$	Solve for x. $6 + x = -9$	Solve for x. $9 = \frac{x}{3}$	Solve for x. $14 + x = -4$	Solve for x. $-6x = -12$
Solve for x. $-7 = x - 7$	Solve for x. $6 + x = -9$	Solve for x. $9 = \frac{x}{3}$	Solve for x. $14 + x = -4$	Solve for x. $4x = -24$
